

BSMG 335: INTERNATIONAL BUSINESS AND THE EUROPEAN UNION

COURSE OBJECTIVES

With a population of more than 500 million inhabitants, the European Union is one of the biggest markets in the World, not just in terms of population, but also in terms of capacity to purchase and invest. This market can be divided in two halves: the Europe of the 15 and the Europe of the 10. This division exists because the Europe of the 15 has the buying power, while the Europe of the 10 is the ideal place for direct foreign investments, principally from North America.

The involvement of the European Union in international business and global competition is fundamental to the functioning of the global economy. This involvement requires knowledge of the economic resources of each country, logistics used, methods of payment and any other aspect relevant to the creation of a business plan in the European Union. For this reason, the principal objective of the course is to introduce the student to the different aspects of a trade system, focusing on investments within the European Union.

Upon completing this course, the student should be able to:

- Analyze the economic, cultural and political climate of the European Union as a whole, and of each of its members.
- Analyze the impact of the different laws which affect foreign investment in the European Union.
- Understand the different market strategies utilized to make an investment in the European Union.
- Analyze the impact of the European Union on international economy and commerce.

Additionally, throughout the course, students will do case studies related to the course material. This will be complemented by visits to Spanish businesses with international influences. Some of the businesses that we will visit are:

- Bassilipo, El Corte Inglés

STRUCTURE

The format of this course will consist of the presentation of the different topics by the professor and the active participation on the part of the students. Classes will be a combination of theory and practice with case studies and analysis of news articles in class.

Following the norms of the "Writing Program", each student will turn in a research paper, typewritten in WORD, font Arial 12, double-spaced. The paper should be 6-8 pages long. For this paper, each student must select a country in the European Union, to which they will try to introduce a service or product, following the trade system as learned in class. This project will be presented to the class in a 10-15 minute presentation (Note: only one country per student).

TEXTBOOK

There is no text. The student will have a dossier on each chapter with a summary and a series of readings.

EVALUATION

Participation	25%
Paper	10%
Quizzes (2)	15%
Midterm Exam	25%
Final Exam	25%
Total	100%
